Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,384,634 to Takehara. Takehara discloses storage means (figure 15) for storing sheets conveyed from an image forming device; matching means (ST and 155) for regulating at least one end of a sheet bunch stored by said storage means to match said end of sheet bunch at a predefined matching position; staple means (200a) for stapling said sheet bunch stored by said storage means; holding means (1107 and 38) for gripping and conveying said sheet bunch matched at the matching position back in a first direction opposite to said one end of said sheet bunch and subsequently gripping and conveying said sheet bunch forward in a second direction toward said one end of said sheet bunch; and a controlling means (c12 lines 20+) for controlling said stapling means so as to perform a first stapling after once the holding means gripping and conveying the sheet bunch back in the first direction from said matching position and subsequently perform a second stapling or multiple staplings while or after the holding means conveying said sheet bunch forward in the second direction.

Regarding claims 2-10 see figure 15 and c12 lines 20+.

Response to Arguments

3. Applicant's arguments filed 11-28-2008 have been fully considered but they are not persuasive. Applicant stated, "The present invention transfers the sheet bunch before the first staple is disposed and after the first staple is disposed." Examiner maintains that Takehara does disclose this feature. The sheets are initially conveyed by 38' and aligned (155' and ST) this being the first conveying. They are then stapled, conveyed a second time and stapled again as set forth in c12 lines 20+ and illustrated in figure 15.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Hageman whose telephone number is (571) 272-3027. The examiner can normally be reached on M-F 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Mackey can be reached on (571) 272-6916. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
